FEEL THE DIFFERENCE OF EFFORTLESS ROTATION

Ergonomic features include the Steri-Mate 360 rotating handpiece combined with the featherweight cable for improved tactile sensitivity during the scaling procedure.

The Steri-Mate 360 rotating handpiece offers features that provide a new scaling experience.

- Fully rotating handpiece allows for free flowing movement of an ultrasonic insert within the oral cavity.
- The detachable and autoclavable handpiece provides the highest assurance of control against cross-contamination.
- The featherweight handpiece cable is designed to provide ergonomic benefits by reducing cable drag.
- Creates a tactile sensitivity similar to that of hand scaling.

CAVITRON TOUCH™ WITH STERI-MATE® 360

A reimagined unit that offers unprecedented comfort and control throughout every procedure.

The Cavitron Touch Ultrasonic Scaling System is designed to be user-friendly, while providing features for an improved scaling experience.

The digital touch screen technology provides an easy-to-use interface. The wireless Tap-On Technology™ foot pedal is designed to reduce leg and ankle discomfort associated with continued foot pedal usage.

Purge mode is used to flush water lines. Runs automatically for 2 minutes.

Rinse mode is for use during an ultrasonic scaling procedure when lavage is desired with no cavitation.

ULTRASONIC POWER LEVEL CONTROL

Slide to select the desired ultrasonic power level for operation.

PRESET POWER MODES

Press and hold for 2 seconds to set.

Quieter than other ultrasonic scaling systems for patient comfort.

Cavitron Ultrasonic Scaling technology can be integrated into a dental delivery unit.
