**Maintenance tips:**

- Use only Midwest products recommended by DENTSPLY International Inc. to maintain your handpiece.

- Make sure to dry thoroughly with a gauze pad or paper towel.

- Avoid using a warm air stream from a dental or utility air source to dry your handpiece, as this may damage the internal working parts of the handpiece.

- Store your handpiece in a dry, clean environment to prevent corrosion and maintain its performance.

- Regular maintenance and cleaning are essential to prolong the life of your handpiece and ensure optimal performance.

**WARNING:**

- Never attempt to open the handpiece or modify it in any way. This can void the warranty and may cause damage to the handpiece.

- Always follow the manufacturer's instructions for all maintenance and cleaning procedures.
